

Painted Farmhouse Wall Shelf w/Hooks - OTNR4 & OTNR5

Thank you for purchasing our Hook Shelf. Assembly of this product requires a screwdriver. We have found it helpful to have a second person present in at least one step of the assembly.

Lay out product on a non-abrasive surface to avoid scratching finish.

NO.	DRAWING	DESCRIPTION	QTY.
A		HOOK SHELF	1
B		FENCH CLEAT	1
C		WOOD SCREW	6

STEP 1

Identify and count all parts using diagram above. Part A is the Hutch, Part B is the Cleat.

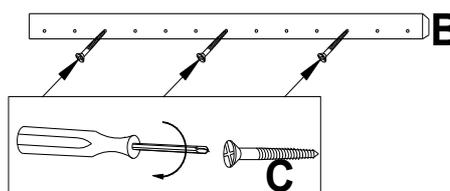

STEP 2

Identify and count hardware using box at right.

Note: 3 of the wood screws are attached to the Cleat (B) during transit and will be removed in the next step.

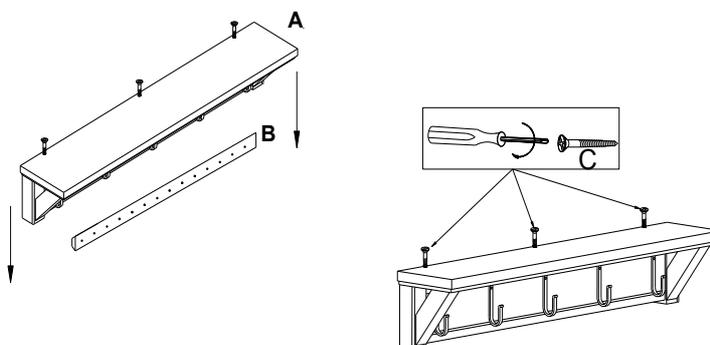

STEP 3

Remove Cleat (B) from the back of the Hook Shelf (A) by unscrewing the 3 50mm pre-installed Wood Screws (C) on top of Hook Shelf (A). Locate studs behind drywall in desired location. Attach cleat with three 50mm Wood Screws (C) to studs.

STEP 4

Set Hook Shelf (A) onto Cleat (B) and attach with three 50mm wood screws (C).

NOTE: It is recommended that the Hook Shelf be stud-mounted for stability. If unable to locate studs, you may need to use an alternative fastener for your application.

CARE: Clean with mild soap and wipe dry.
